Skiva PowerVault A15000 Rapid Charging Portable Battery Pack

AP113

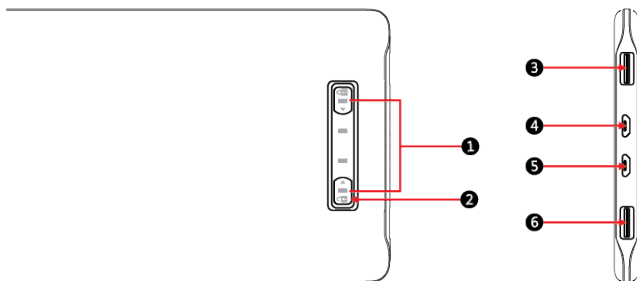

Document Revision No.: 1.0

Overview:

The Skiva PowerVault A15000 is a high-capacity power bank that is designed to provide extra power to your mobile devices. Other than high battery capacity the best is that it has two ports to recharge the power bank, which results in fast recharging at reduced time. It also supports charging multiple devices at one time. With a compact design, crisp display the PowerVault A15000 makes a smart addition to your travel electronics gadgets.

Explore the PowerVault A15000:

- ① Working indicator ② Sliping turn on button ③ USB output port 1
- ④ DC 5V input port 1 ⑤ DC 5V input port 2 ⑥ USB output port 2

Safety Information:

It is important that you read the following safety information prior to using your Skiva PowerVault 15000.

- To charge your PowerVault A15000, use the manufacturer's 5V/1A charger. Using alternate chargers may damage the device.
- Do not attempt to charge the PowerVault A150000 with a defective charger.
- Keep the PowerVault A15000 away from fire or extreme heat.
- Allow air flow to the PowerVault A15000 when charging.

Features:

- Ultra-high Capacity 15,000mAh that can charge almost any portable electronic devices up to 7 times including, iPhone 5s/5c/5/4s/4/3GS, iPad Air/4/mini, iPod, Samsung Galaxy S5/S4/S3/S2/Note 3/Note 2/Note, other Android devices and almost all tablets, camera, MP3s.
- Slimmest (10 mm) design with massive 15000mAh capacity makes it portable and gives a fashionable look. It comes with reliable and certified LG batteries to better safety, longevity and efficiency than most other batteries.
- Intelligent overheat, overcharging and over-current protection built-in.
- It has an intelligent controller inside battery pack switch off charging automatically once the device is fully charged.
- 1 Year Warranty and full support from Skiva.

Getting started:

- 1) Connect the PowerVault A15000 to your laptop with a micro USB cable (see Figure 1). When connected properly, the first indicator light will illuminate.
- 2) Keep the PowerVault A15000 connected until fully charged. When charging is complete, all four indicator lights will illuminate.
- 3) Disconnect the PowerVault A15000 from the charger after the battery is fully charged. Leaving the device connected after the battery is fully charged might reduce the battery's capacity in future charges.

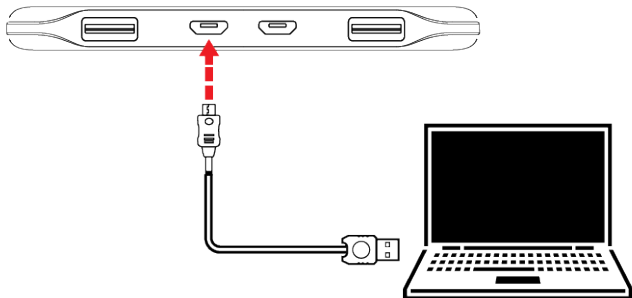

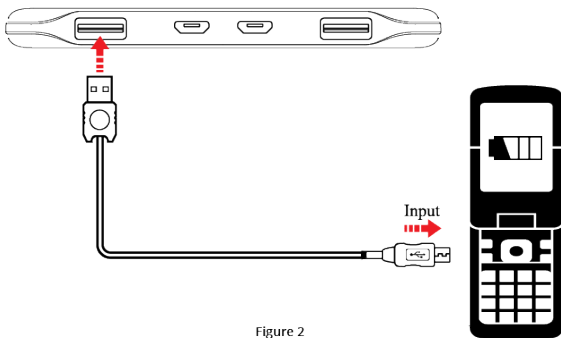

Figure 1

Recharge your devices:

- 1) Connect the PowerVault A15000 to your mobile device using a USB cable (see Figure 2).
- 2) Slide the on/off button to the on position (see Figure 3). The indicator light will start blinking to indicate that charging has started.
- 3) Keep the mobile device connected to the PowerVault A15000 until fully charged. When charging is complete, the indicator light will stop blinking.

Troubleshooting:

| Issue | Resolution |
|---|---|
| When charging the PowerVault A15000, the indicator light does not illuminate. | Ensure the charger is connected correctly through the micro USB port. |
| The PowerVault A15000 does not recharge the mobile device. | Ensure the device is connected correctly through the USB port. |
| The power indicator does not illuminate after clicking the power button. | Recharge the PowerVault A15000. |
